START

What would be a good example for debt for nature swap?  
(eg. Saving rainforest)

What are benefits for debtors through a debt for nature swap?

Pick a Star card

# DEPT FOR NATURE SWAP

Protecting environmental becomes a global issue, not just a single country. An advanced nation clears debt for a country which is financially poor to contribute debt to nature.

AIDEA

Who could sign up for debt for nature swap?

FOREST

When the first swap happened? In Where?

who conceived the concept of debt for nature swap?

What would be a good example for debt for nature swap?  
(eg. Saving rainforest)

FOREST

# Our Debt to the Nature

What would be weakness of debt for nature swap?

AIDEA

When the first swap happened? In Where?

MOUNTAIN

What are benefits for debtors through a debt for nature swap?

Pick a Star card

# Board game rules

## Game option 1 (2~4 people)

### Starting

Creditors and Debtors start with 3 stars.  
(\*for 3 people, 2 debtors and 1 creditor)  
Debtors owe 5 stars to creditors.

### Rules

Debtors should pay creditors at least a star, when they come back to start point again. If debtors can not pay, 1 star goes debt.

Debtors can pay more than one star. (1 star+1 extra star will cancel the debt.  
(eg. 1 star+2 star cancels 2 star from debt amount)

Debtors can borrow stars from creditors twice at anytime but when creditors have less then 5 stars, they can not. Giving stars to debtors is creditors decision but they have to give at least a star. The amount of star is creditors; debt.

### Game Over

Debtors got caught by creditors 4 times. Creditors contributed 2 stars each stops (forest, mountain and river).  
A Debtor or Creditor has no stars. (or debtor has no debt.)

### Catching Debtors & Boardgame Pieces

There are 4 pieces for this game. When creditor catches a debtor then debtor goes to start point. (this case, debtor no need to pay interest)  
Also there is a relationship between each pieces. When the :  
man catches the girl he gets a star from her.  
girl catches the boy she gets a star from him.  
boy catches the woman he gets a star from her.  
woman catches the man he gets a star from him.  
\*All caught pieces must return to the start.

## Game option 2 (4 people)

### Starting

2 groups of two people start with 2 stars. (The piece Man&Woman and Boy&Girl can not be the same group)

### Rules

Contribute 4 stars to each stops.

### Game Over

- Debtors got caught by creditors 4 times.
- Creditors contributed 2 coins each stops (forest, mountain, and river).
- A Debtor or Creditor has no coin. (or debtor has no debt.)

### About Debt for Nature Swap

Debt for nature swap was conceived by Thomas Lovejoy. The first case of swap happened in Bolivia 1987. This debt for nature swap needs at least two characters. One developing country can sign up for swap. Then all the debt for developing country contributed to the nature. This could be saving forest or protecting endangered species and so on. Even though this debt for nature swap has strong points, there are weaknesses as well. First of all, missing direction of funds, low budget, poor impact and risks for creditors. However, there are some good benefits for the creditors as well. They could promote themselves by signing up for the swap and managing ecosystem and so on. Which are not every country can afford.

### Star signs and Question stops

There are stops with the question. When the stop has a star mark, you get a star when the answer is correct. Incorrect answer gains nothing. However, for the stop which has no star, you must answer the correct question. Also there is no star as a reward.

# BOARD GAME POSTER

This is the final board game poster design. Considering the performance of both, (poster and board game) the poster is like a paper bag, with dotted lines. The paper bag form is for display as a poster, then when it comes to the audience, it can be separated for use of board game. Even though it has been separated, the first page can be a poster. The poster format is a paper bag because of outdoor use. (eg, wind, ect.)
