MEMEFEST RESPONSE

Lucy Wells

Submission: URBAN POSTERS

The concept of my work is to reflect the way technology has influenced how we communicate in various forms - democratically, through the media and intimately with our interpersonal relationships and communities. Its a simple statement of the modern time juxtaposed with current technology iconography to make a quick message of the current communication barriers and a new social etiquette imposed by technology and social media.

The idea is not to teach people these ideas, as it is already very familiar issue but its intentions are to open up the perspective of the impact its having on society in order for audience to be reflective in hope of re-establishing intimacy, connection and authenticity.

MODERN VOICE
